Psychosocial hazards

ASA - Practice Managers Conference

25 November 2022

Cheryl Wood

Risk Adviser, Avant

Work Health and Safety Issues

Act

Outlines the employer's broad responsibilities

Regulations

Set out specific requirements for particular hazards and risks, such as noise, machinery and manual handling

Codes of practice

Provide practical information on how the employer can meet the requirements in the Acts and Regulations

Regulating agency

Administers WHS laws, inspects workplaces and provides advice and enforces the laws

What are psychosocial hazards?

“those aspects of the design and management of work, and its social and organisational contexts that have the potential for causing psychological or physical harm” (1)

In the workplace or associated with the type of work

AND

Have a negative impact on
Physical health
Mental health
Cognitive health
Emotional health

Bullying

Sexual Harassment

Discrimination

Transition

HR

Reactive

Workplace Health and Safety

Proactive

Types of psychosocial hazards

1

Job demands

2

Low job control

3

Poor support

4

Lack of role
clarity

5

Poor
organisational
change
management

6

Inadequate
reward and
recognition

7

Poor
organisational
justice

8

Traumatic
events or
material

9

Remote or
isolated work

10

Poor physical
environment

11

Violence and
aggression

12

Bullying

13

Harassment
including
sexual
harassment

14

Conflict or poor
workplace
relationships
and
interactions

Hazardous manual tasks

Code of Practice

OCTOBER 2018

Contents

Foreword	4
1. Introduction	5
1.1. What is a musculoskeletal disorder (MSD)?	5
1.2. What is a hazardous manual task?	5
1.3. Who has health and safety duties in relation to hazardous manual tasks?	6
1.4. What is involved in managing the risk of musculoskeletal disorders?	7
2. Identifying hazardous manual tasks	11
2.1. How to identify hazardous manual tasks	11
2.2. Characteristics of hazardous manual tasks	12
3. Assessing the risks	19
3.1. When should a risk assessment be conducted?	19
3.2. How to do a risk assessment for hazardous manual tasks	19
3.3. What are the risk factors?	20
3.4. What are the sources of the risk?	27
4. Controlling the risks	31
4.1. The hierarchy of control measures	31
4.2. Purchasing to eliminate or minimise risks	33
4.3. Changing the design or layout of work areas	34
4.4. Changing the nature, size, weight or number of items handled	36
4.5. Changing the system of work	42
4.6. Changing the work environment	44
4.7. Using administrative control measures	46
4.8. Implementing control measures	47
5. Reviewing control measures	49
6. Role of designers, manufacturers, importers and suppliers	51
6.1. Designers	51
6.2. Manufacturers, importers and suppliers	52
Appendix A—Glossary	55
Appendix B—Examples of controlling MSD risks through design	57
Appendix C—The risk management process for manual tasks	59
Appendix D—Hazardous manual task identification worksheet	60
Appendix E—Discomfort survey	61
Appendix F—Risk assessment worksheet	62
Appendix G—References for further risk assessment methods	69
Amendments	71

Risk Matrix and risk assessment

Likelihood	Consequences				
	Insignificant <i>Risk is easily mitigated by normal day to day process</i>	Minor <i>Delays up to 10% of Schedule Additional cost up to 10% of Budget</i>	Moderate <i>Delays up to 30% of Schedule Additional cost up to 30% of Budget</i>	Major <i>Delays up to 50% of Schedule Additional cost up to 50% of Budget</i>	Catastrophic <i>Project abandoned</i>
Certain >90% chance	High	High	Extreme	Extreme	Extreme
Likely 50% - 90% chance	Moderate	High	High	Extreme	Extreme
Moderate 10% - 50% chance	Low	Moderate	High	Extreme	Extreme
Unlikely 3% - 10% chance	Low	Low	Moderate	High	Extreme
Rare <3% chance	Low	Low	Moderate	High	High

Risk Assessment Template

Workplace Health and Safety Queensland

Mentally healthy workplaces

Psychosocial risk assessment tool

This risk assessment tool is designed to help employers meet their legal obligations to manage risks associated with psychological injury. You may need to consider other risk factors unique to your organisation - these factors can be added to the 'additional factors' sections of this risk assessment tool.

To use this tool, read the statements below and tick 'yes' to any of the statements you agree with, making any relevant comments that should be considered as part of the risk assessment process. This risk assessment tool can be used as a stand-alone assessment or in conjunction with an employee survey.

This tool forms part of the risk management process. Risk management is a four-step process for controlling exposure to health and safety risks associated with hazards in the workplace, with consultation with workers occurring at each step. As outlined in Part 5 of the *Work Health and Safety Act 2011*, consultation is an essential part of the risk management process. The *Work health and safety consultation, co-operation and co-ordination Code of Practice 2011* provides guidance for employers about strategies for effective consultation with workers. For further information on the risk management approach, please read the *How to manage work health and safety risks Code of Practice 2011*.

The *Work Health and Safety Act 2011* states that to properly manage exposure to risks, a person must:

- identify hazards
- assess risks if necessary
- control risks
- review control measures to ensure they are working as planned.

Completed by: _____ Position: _____ Date of risk assessment: _____ Review date: _____

Direct observation	Yes	No	Comments (reasons for your assessment)
Are there any understaffed work areas?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there any people showing signs of stress (e.g. verbal abuse, openly criticising others or the organisation, general frustration with work environment, incivility)?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there work areas where employees handle conflict destructively (e.g. using blame language or personal criticism)?	<input type="checkbox"/>	<input type="checkbox"/>	
Do workers seem to be 'on edge' or hypervigilant when discussing work or working through problems?	<input type="checkbox"/>	<input type="checkbox"/>	
Do workers attend work showing signs of illness (i.e. colds and flus)?	<input type="checkbox"/>	<input type="checkbox"/>	
Additional comments?			

Psychosocial risk assessment tool

Step 1. Identify the hazards

Workplace data	Yes	No	Comments (reasons for your assessment)
Are there any indications when looking at employee sick leave, with or without certificates, which show relevant trends (e.g. headaches, recurrent colds or flu or musculoskeletal disorders)?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there any departments, units, roles or positions that are showing higher levels of sick leave compared with others?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there any cases of annual or long service leave (or non-usage) as a result of psychological risk factors or work-related stress (e.g. using annual leave when sick leave is depleted or not using annual leave due to work pressure)?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there cases of workers' compensation for psychological injuries (e.g. post-traumatic stress disorder, anxiety and/or depression)?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there trends or common themes in complaints or workplace grievances?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there trends in the Employee Assistance Program (EAP) usage and types of issues managed?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there industrial relations records or disputes that link to job stress or dissatisfaction in the workplace?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there any related and unresolved issues in minutes of meetings (e.g. workload or change in work roles)?	<input type="checkbox"/>	<input type="checkbox"/>	
Are there work schedule records that reflect on work, overtime usage or other relevant information?	<input type="checkbox"/>	<input type="checkbox"/>	
Is there a lack of knowledge and compliance with the organisation's policies and procedures related to psychological health (e.g. harassment, bullying or discrimination)?	<input type="checkbox"/>	<input type="checkbox"/>	
Additional comments?			

Psychosocial risk assessment tool

Step 2. Assess and prioritise risk

Psychosocial hazards and factors	Duties/task elements	Consequences (possible injury outcomes)	Injury risk potential (likelihood vs consequences)	Action required	
				Yes	No
Low job control This factor is related to control over and involvement in decisions that could be reasonably expected in a job or role. Low job control can include: <ul style="list-style-type: none"> • work methods that are predetermined (e.g. how the work is undertaken and the approach taken is already decided for the worker) • limited control over priorities or workload • strict and inflexible work schedules • workers are not consulted about decisions impacting them • inability to access necessary tools, resources or information • the pace of work • shift work • other (please specify). 				<input type="checkbox"/>	<input type="checkbox"/>
